DEDICATION

MILTON S. BRIGGS

The 1962 Mainstay is dedicated to Professor Milton S. Briggs, Chairman, Department of Business Administration.

Professor Briggs was Assistant Superintendent of Schools in New Bedford when appointed in 1958 to develop a program of Business Administration at the Institute.

As an educator for over thirty years, Professor Briggs has always shown a deep interest in the student. This year, with the graduation of the first class in Business Administration, he has achieved a long-awaited goal.

We, at New Bedford Tech, are fortunate to have the dedicated services of this experienced educator.

DR. JOHN E. FOSTER

April 5, 1962

To the Graduating Class of 1962:

Recognition takes many forms: a handclasp, a pat on the back, use of a proper name or title, a salary increase, an emblem, praise, or many others. But various situations present unique opportunities for providing recognition to others, and these opportunities should be seized when they come, not chased when they are gone.

In brief: Others will like you to the extent that you accord them recognition.

I believe that if each of you in your daily work recognizes not only the good you are doing, but in turn recognizes the good of others, whether they be your superiors or subordinates, you will find success in abundance.

We of the Institute realize that during your stay here, you have found many things to be desired. We also recognize our shortcomings. There are improvements to be made, and they are being made.

When you go out into the world, we hope you will recognize and remember the good we have tried to do. Forgive us the things we could not do.

Congratulations and best wishes to you all,

Dr. John E. Foster, President

BOARD OF TRUSTEES

The Board of Trustees is pleased to extend to the first graduating class from New Bedford Tech, since its accreditation, sincere and best wishes for success in their future plans.

Left to right — Mr. J. Dawson, Mr. R. B. Rymszewicz, Mr. W. Smietana, Mr. P. Roderiques, (Chairman) Mr. J. E. Vertente, Dr. J. B. O'Toole, and Mrs. R. B. Brooker.

Missing when the picture was taken were: Mrs. L. B. Nunes, Mrs. J. Epstein, Mr. M. Gallis, and Mr. J. E. Carignan.

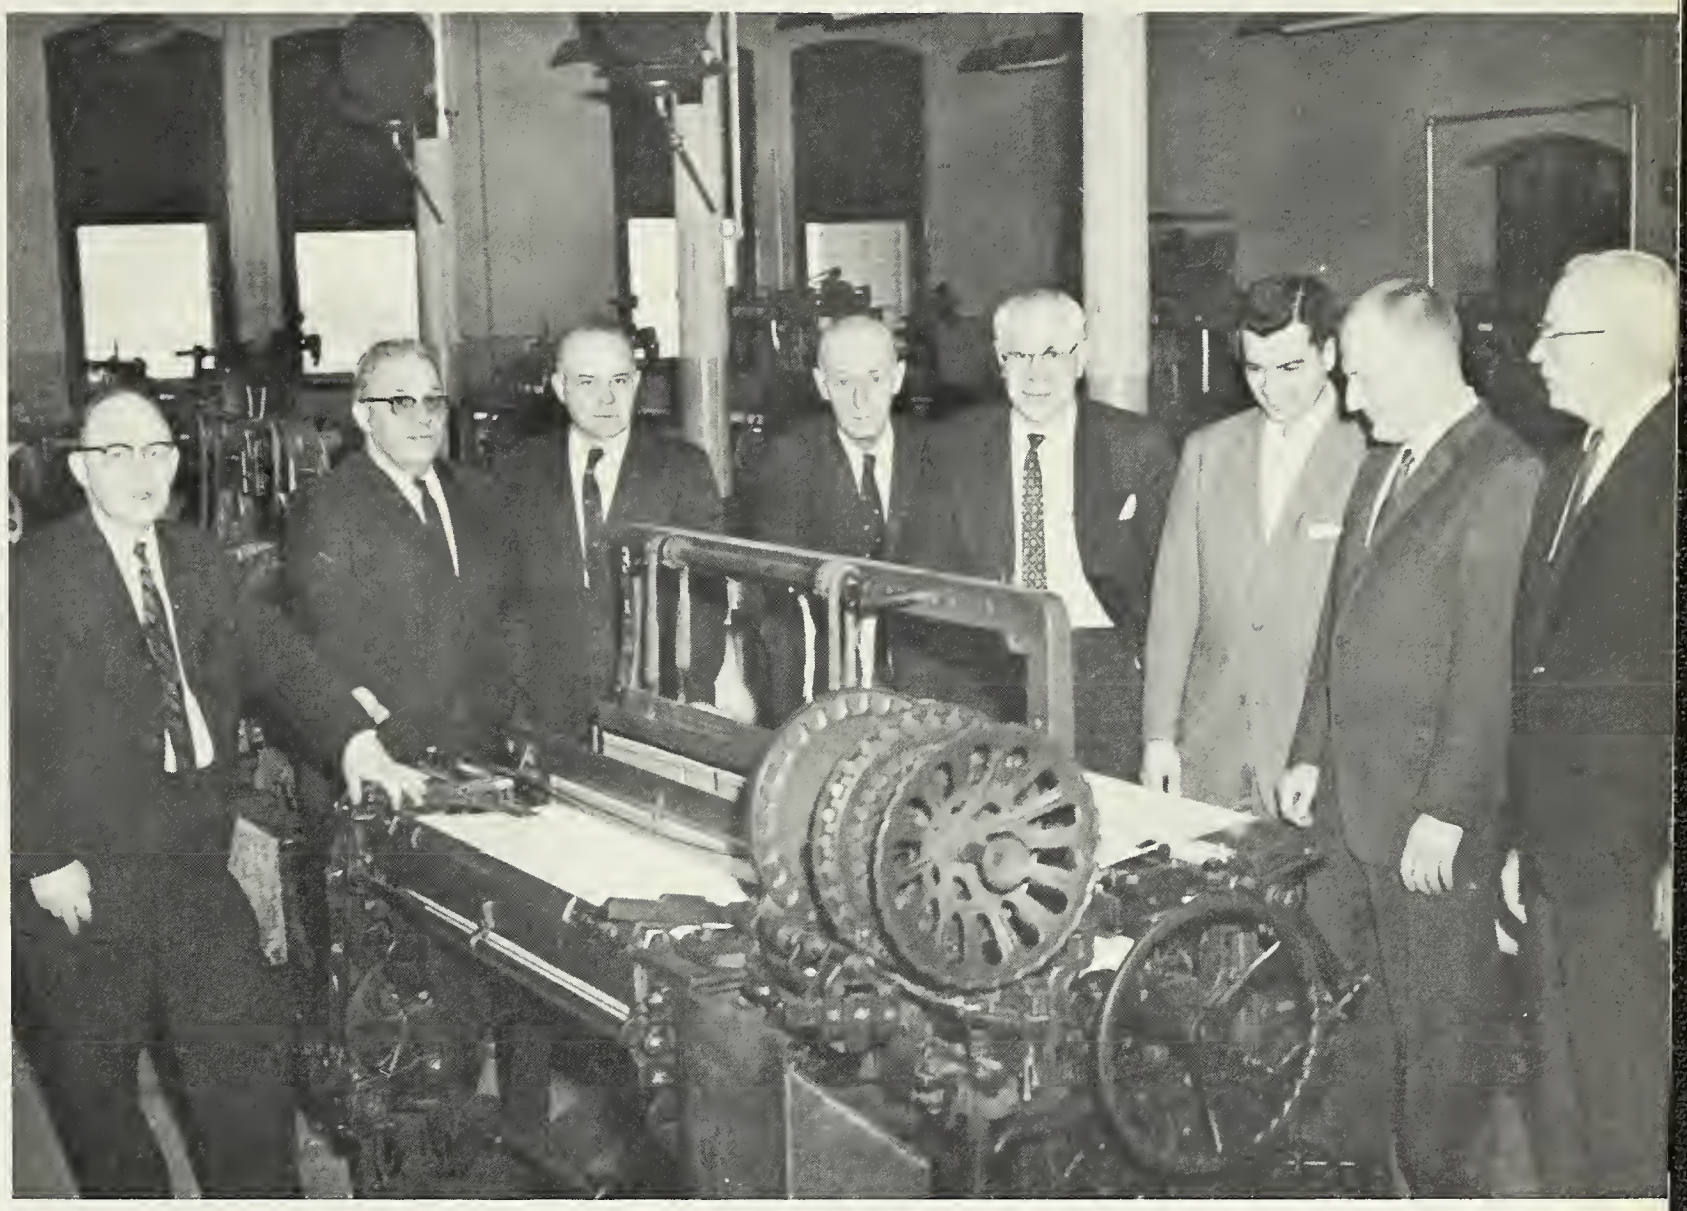

FACULTY

ENGLISH AND SOCIAL SCIENCE

Earl J. Dias, Celestino D. Macedo, Vivian Zerbone, Augustus Silva, Leo M. Sullivan, Sheldon H. Harris, Louis J. Robitalle.

TEXTILE TECHNOLOGY

Clifford N. Beck, Louis Pacheco, Jr., Edward Cloutier, John T. Regan, Antone Rodil, William A. Silveira, Arthur S. Swaye, James L. Giblin.

MECHANICAL ENGINEERING

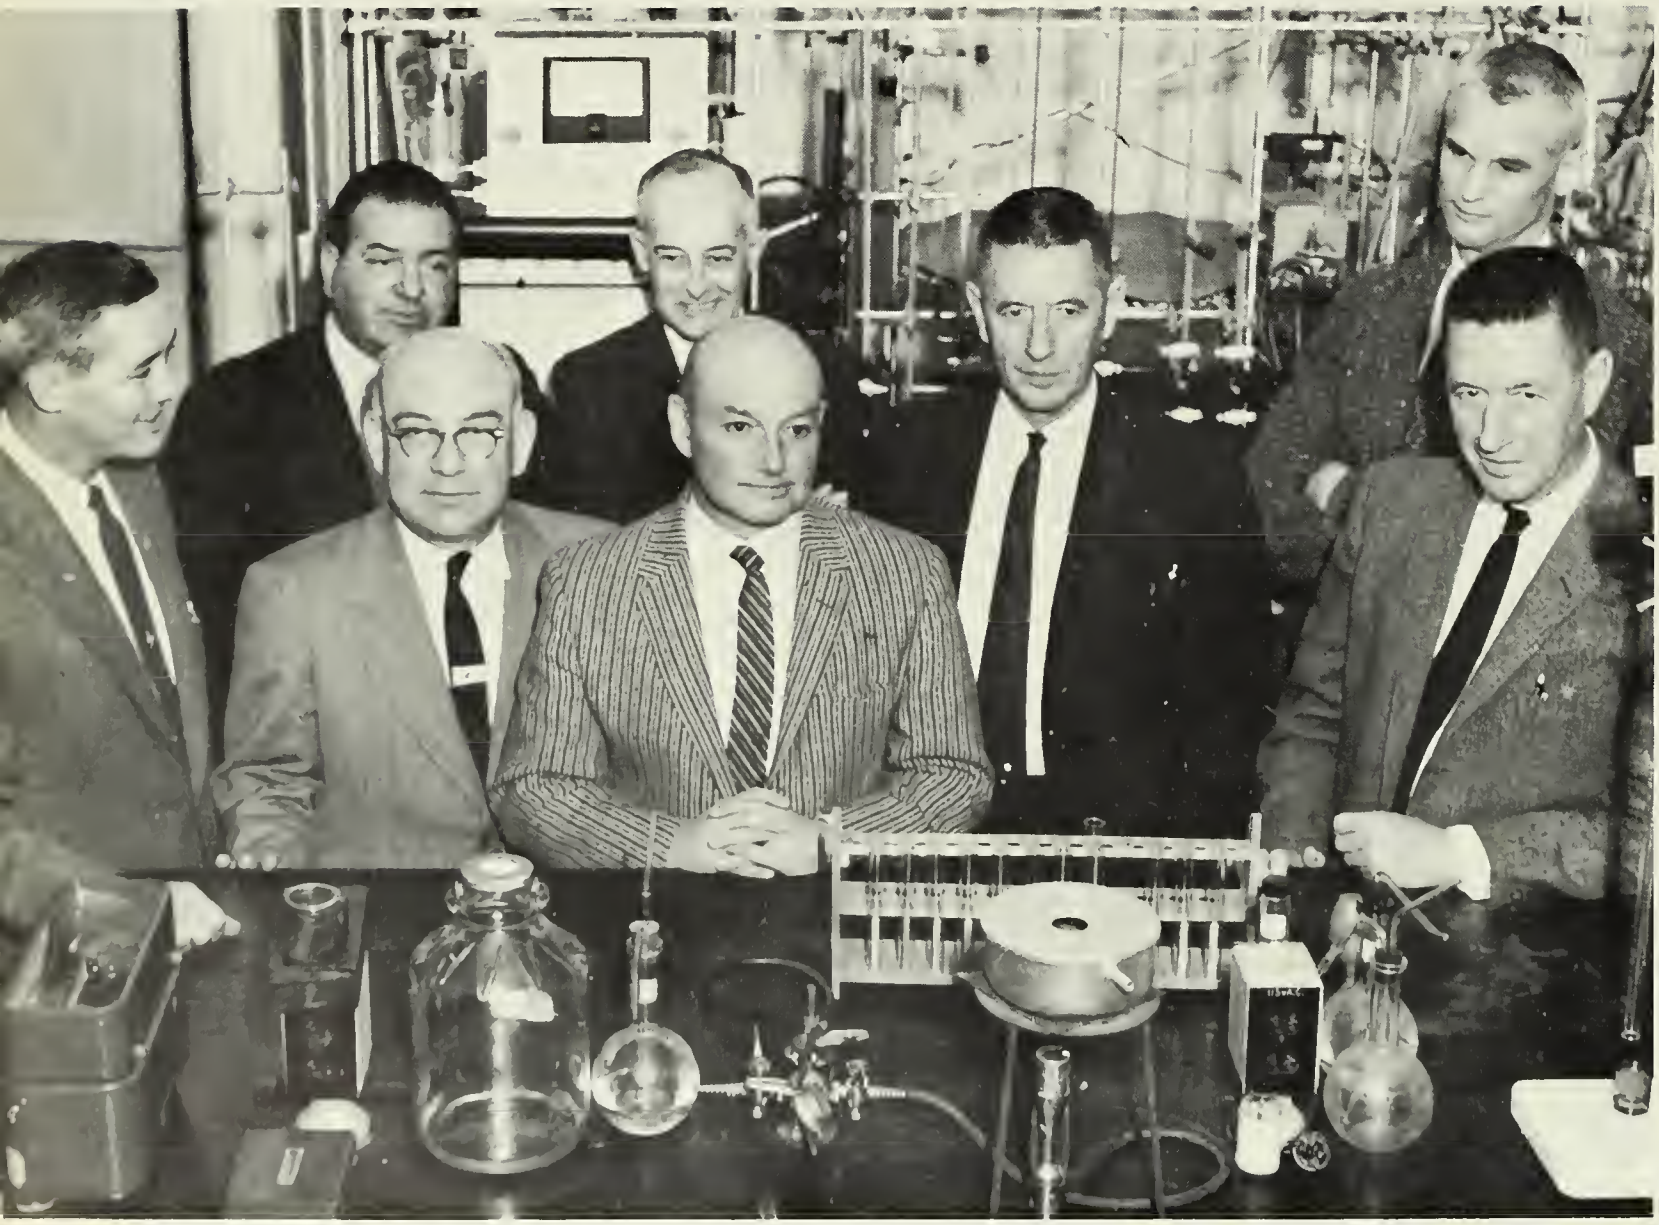

Alden Counsell, Fryderyk Gorczyca, Conrad P. Richard, John R. Barylski, Joseph L. Roberts, Howard C. Tinkham.

MATH AND PHYHICS

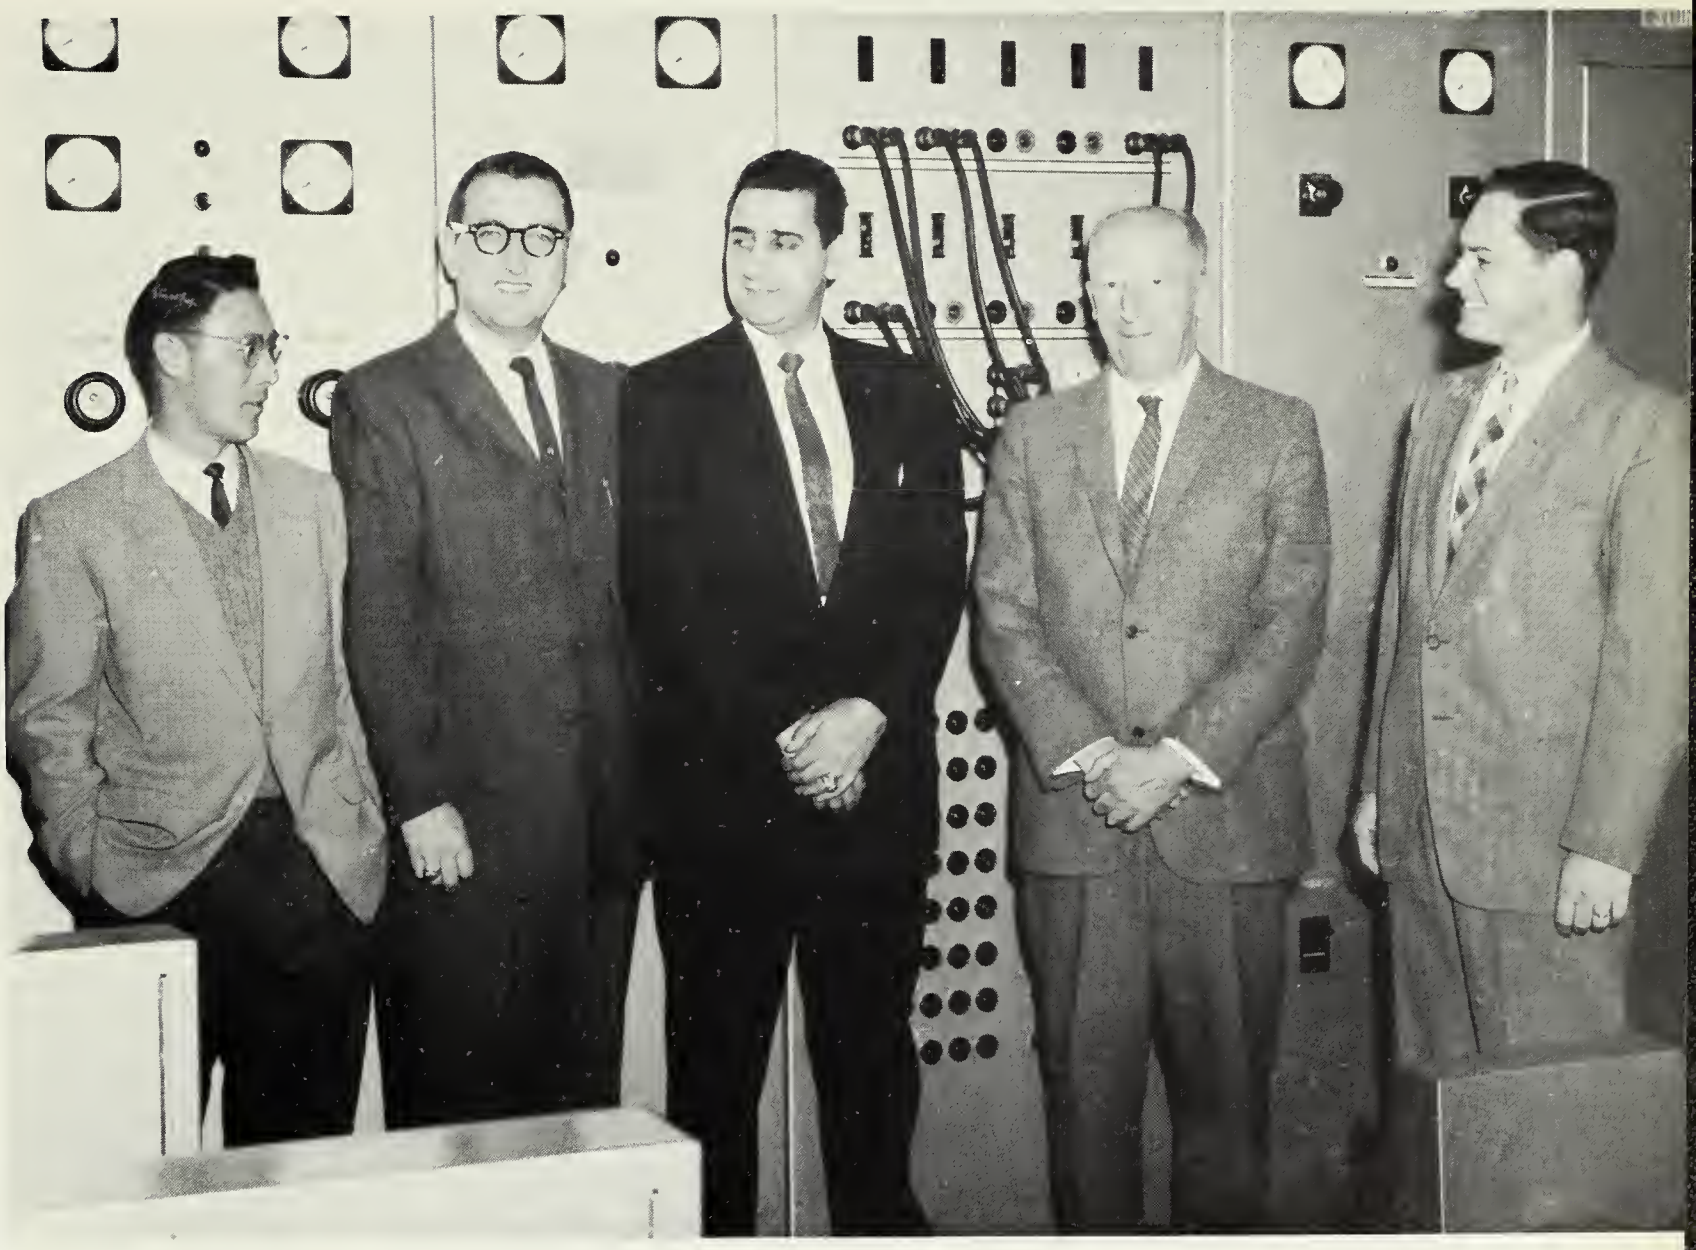

Walter Mierzejewski,, Michael Crowley, Warren M. Holt, Anthony J. John, George Thomas.

CHEMISTRY

Front Row: James A. Flannagan, Edmund J. Dupre, John C. Broadmeadow, Fred R. Tripp.
Rear: Ferdinand Fiocchi, Louis E. F. Fenaux, Francis Tripp, Dr. Dwight F. Mowery, Jr.

ELECTRICAL ENGINEERING

George Cheng, Richard Walder, Lenine Gonsalves, John Waring, Hans Picard.

DESIGN DEPARTMENT

Evelyn Ramalhete

Margot Neugebauer

Robert C. Booth

BUSINESS ADMINISTRATION

Edward A. Cormier, Frederic R. Mattfield, Frank Golen, Milton S. Briggs, George Jacobs, Henry Swift.

BUSINESS ADMINISTRATION

MR. BRIGGS

The Business Administration Department reflects the increasing awareness in industry of the fact that merely technically-trained personnel are not adequate to meet the changing needs of world economy. It recognizes that the ultimate aim of education is to produce an intellectually and emotionally mature person with a sound sense of values as well as competence in technical skills. Its specific objective is the education of its students to their fullest potential for competence in business and effectiveness in civic life.

BUSINESS ADMINISTRATION

ACCOUNTING

Public, private, institution, and government accounting present excellent opportunities for the skilled accountant. The Accounting program provides the educational foundation that is required for training in these fields.

Throughout the program, the accurate interpretation of financial reports and the necessity for efficiency as well as competence in record keeping is stressed.

Because of the increased use of mathematics in decision making, courses in mathematics and statistics are an essential part of the program. Also included in the study of accounting are courses in accounting principles, cost accounting, auditing, taxation, business law, principles of marketing, and insurance.

MANAGEMENT

MANAGEMENT

The Management program offers a study of the many phases of managerial problems and practices concerned with planning and supervision. In addition, the course deals with the application of theories of human relations in order to achieve greater performance through organization and efficiency.

This program supplies the background for the student to assume the responsibilities of junior executive or management positions. Also, it aims to develop the necessary managerial skills for advancement to top executive positions following some years of business experience.

Fundamental courses in principles of management, labor-management relations, accounting, effective speaking, and seminars in the problems of business are offered.

MARKETING

MARKETING

The Marketing section of the Business Administration Department is designed to prepare students for positions in fields such as advertising, selling, buying, distribution, and market research. The program is aimed at giving the student a preparatory background in these areas prior to entering the field. It also provides the student with an insight into the problems which will confront him in the business world.

The courses offered in this program include advertising and selling, market research, materials and fabrics, business policy seminar, business law, taxation, insurance, and labor-management relations.

CHEMISTRY

CHEMISTRY

DWIGHT F. MOWERY, JR.

Chemistry is the systematic study of matter, its properties and transformations. Since all manufacturing industries must start with some form of matter for the fabrication of their finished products, the science of chemistry is fundamental to all industries. Thus the need for chemists is ever increasing. The advent of the space and atomic ages, as well as the tremendous strides in medical research, has produced many challenges which must be met by chemists.

The Chemistry Department is responding to these and many other challenges by providing fundamental courses to all students at the Institute, as well as offering for the chemistry student a curriculum designed to give a solid foundation in the fundamental principles of chemistry. It also provides for sufficient training in laboratory techniques to form a basis for specialized work.

This program, which includes courses in the fundamental sciences of mathematics and physics, prepares the chemistry student for graduate school, industry, teaching, or research.

GRAPHIC ARTS

ROBERT C. BOOTH

The Graphic Art course consists of a curriculum which emphasizes the flexibility of advertising as an important tool in doing the preliminary work of selling, market research, and the study of theme, layout, media, design, color, and illustration.

The program is concerned with the study of problems relevant to advertising and selling. In addition, it attempts to provide for the best utilization of the Institute's business and art resources by students who plan a career in magazine and newspaper advertising, illustration, photography, salesmanship, or research as applied to advertising.

The Class of 1962 includes the first Graphic Art majors to be graduated with a Bachelor of Science degree.

TEXTILE DESIGN AND FASHION

The aims of the Textile Design and Fashion curriculum are to provide the required technical knowledge for those concerned with the artistic and functional elements of textile materials. For the styling, designing, and development of fabrics and textures, it includes such courses as applied textile design, theories and practical studies in textile manufacturing, graphic arts, and further studies in the history of art, drawing, and painting.

In addition, complete projects are required whereby the students create and execute their own original fabric and apparel designs.

ELECTRICAL ENGINEERING

ELECTRICAL ENGINEERING

LENINE M. GONSALVES

Electrical Engineering is concerned with the generation and utilization of electrical energy. A firm command of mathematics and of the basic sciences is important to all electrical engineering students. Today, the demand is for the engineer who, at times, must become a scientist searching for the fundamentals necessary for engineering development.

This program provides a background in many areas. Through the use of laboratories, the student acquires familiarity with the tools he will use. Professional subjects are then introduced which integrate the knowledge of the sciences into applied theory. These include computer circuitry, communication and information theory, circuit theory, and energy conversion.

TEXTILE TECHNOLOGY

TEXTILE TECHNOLOGY

JAMES L. GIBLIN

The Textile Technology program is designed to prepare students for careers in one of the various fields of textile manufacturing; that is, yarn and fabric development, selling, testing, converting, research, or production.

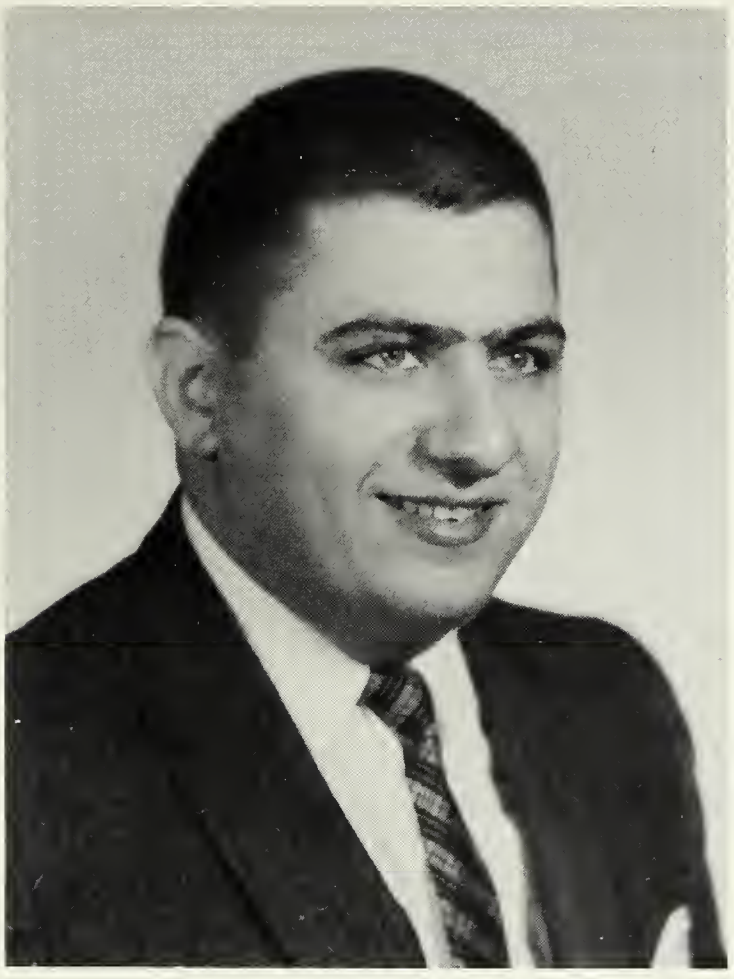

The student, at first, pursues such courses of study as mathematics, statistics, physics, engineering drawing, chemistry, and machine shop process. He is then gradually introduced to the fundamental stages of textiles. As the scope of the student broadens, more advanced stages of textile technology are presented.

Some of these advanced courses include cotton yarn preparation, weaving, fabric analysis, designing, physical testing, microscopy, knit technology, and textile finishing and dyeing.

TEXTILE MANUFACTURING

The Textile Manufacturing course, of three-years duration leading to a diploma, is specifically designed to equip the student with the technical and practical background necessary for one to enter one of the various fields of textile manufacturing; that is, fabric production, converting, selling, and testing.

The student is thoroughly instructed in both the theoretical and practical phases of picking, carding, drawing, and weaving. This work, along with designing and cloth analysis, is introduced in the first year, and the scope is gradually broadened through the second and third years. The blending of natural and man-made fibres of cotton, wool, worsted, and rayon is considered. In the third year, the student studies the processing of rayon, nylon, dacron, and other continuous filaments.

MECHANICAL ENGINEERING

MECHANICAL ENGINEERING

HOWARD C. TINKHAM

The Mechanical Engineering program at the Institute is designed to equip its graduates with the basic scientific principles necessary to enable them to accept responsibilities in the broad field of mechanical engineering. This field includes branches such as research, development, product and project engineering, design engineering, and sales and service engineering.

Courses in metallurgy, mechanics, strength of materials, fluid mechanics, thermodynamics, vibrations, and electrical engineering, all fundamental to his engineering background, form the core of the program along with the necessary calculus and differential equations.

A laboratory program which includes design and engineering laboratory experiments provides a correlation between theoretical principles and their application to engineering problems; while manufacturing processes, machine shop laboratory, plant layout, and tool design give the student an understanding of problems encountered in the manufacture of finished products.

ACCREDITATION

New Bedford Tech reached the pinnacle of academic achievement, when on December 8, 1961 at the annual meeting of the New England Association of Colleges and Secondary Schools, an official announcement was made that New Bedford Tech had been unanimously approved as a member of the Association.

The recognition by the educational agency and the resulting national accreditation provide a considerable degree of prestige for the institution.

FRATERNITIES AND SORORITY

DELTA KAPPA PHI FRATERNITY

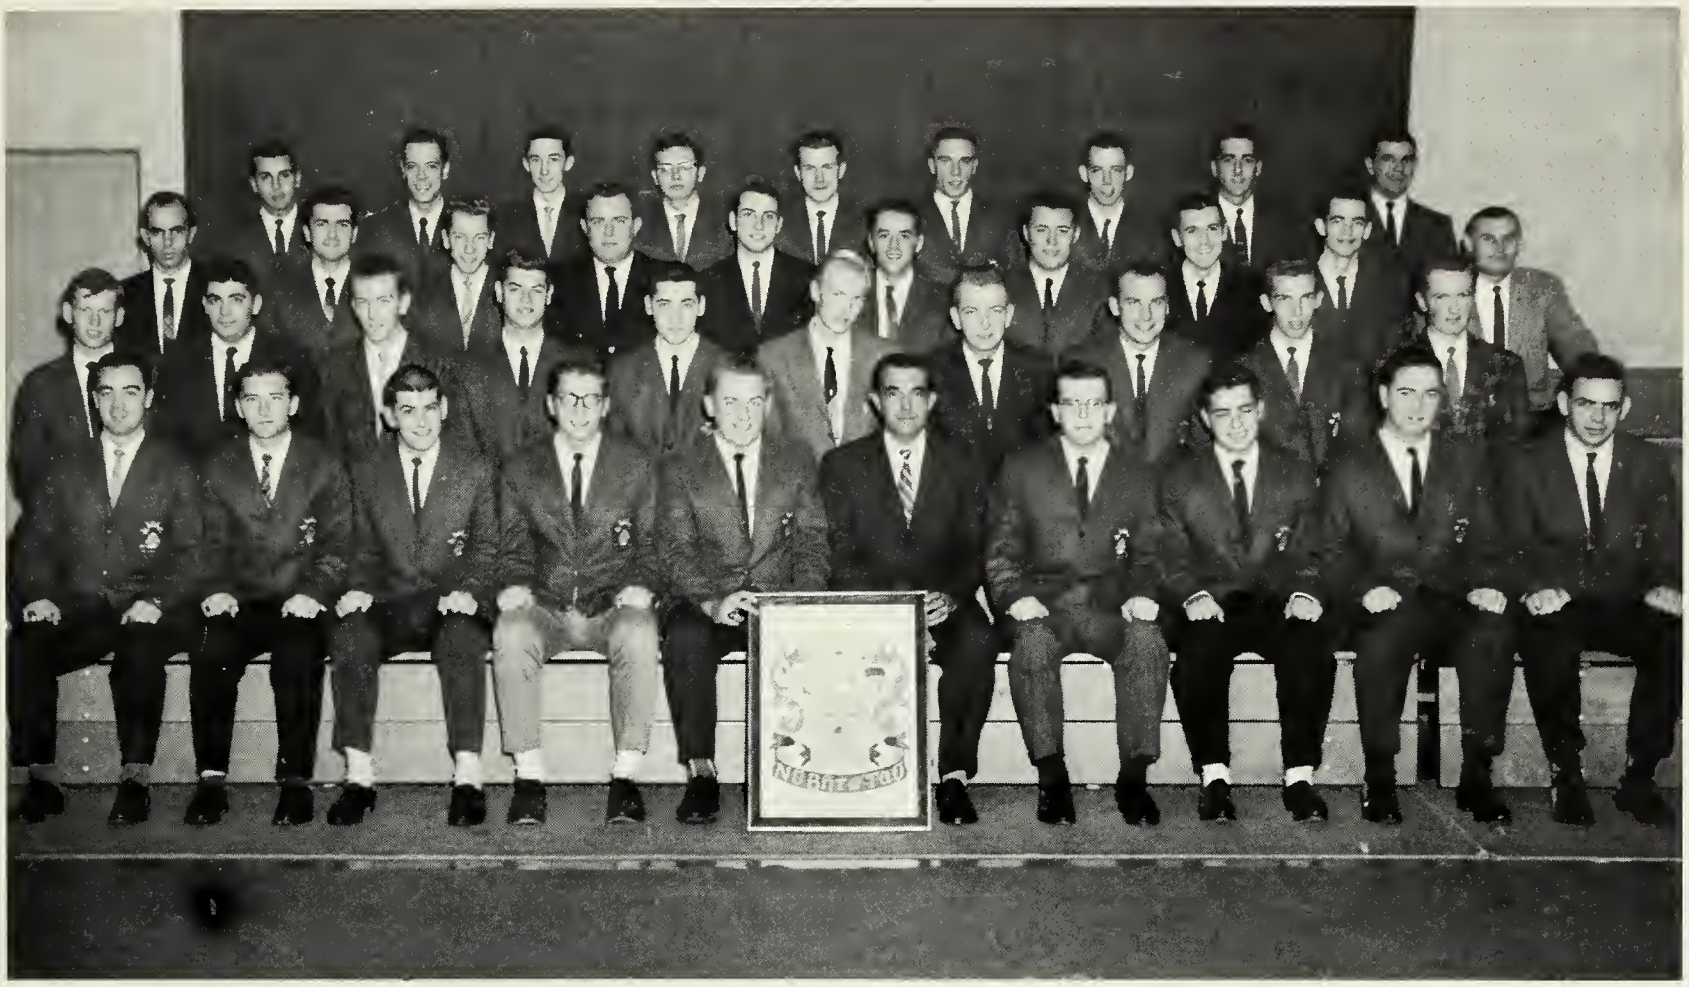

Delta Kappa Phi is one of the oldest professional fraternities in America. Its purpose is mainly one of service to the student and to the school.

The fraternity encourages high scholastic standards from its members in every field of study in addition to active participation in sports and social activities.

It is the aim of Delta Kappa Phi to provide industry and the business world with men of high caliber and executive potential.

NU BETA TAU

Nu Beta Tau Fraternity is the youngest fraternity at New Bedford Tech, having received its charter in 1958. At that time, the charter members realized the need for a purely social fraternity with no professional affiliations. On this basis, Nu Beta Tau was founded.

Nu Beta Tau was the first fraternity in this area to substitute "Help" for "Hell" Week for pledges. This innovation has been well-received both here at school and in the surrounding communities. Non-profit organizations such as St. Mary's Home, the New Bedford Boys' Club, and the Y. M. C. A. here derived the benefits of the pledges' labors during Help Week.

One of the social functions sponsored by the fraternity is the annual Pumpkin Prom held around Hallowe'en. In addition, the fraternity holds monthly smokers for its members, along with seasonal parties for members and their guests.

PHI PSI FRATERNITY

Phi Psi Fraternity was founded at the Philadelphia College of Textile Engineering in 1903. Beta Chapter, here at Tech, was organized in 1904. The aims of the fraternity are to promote good fellowship, social intercourse, mutual advancement of its members and the art of textile manufacturing.

Phi Psi Fraternity is the largest professional fraternity of its kind with ten active chapters and twelve alumni chapters extending along the Atlantic Coast. Phi Psi is now in the process of starting alumni chapters in India and in Ecuador.

During the year, the members acquired a new fraternity house. Among the events of the year were "open houses" for prospective new members and "twist" parties, as well as visits by the Grand Council President and the Treasurer.

KAPPA SIGMA PHI SORORITY

Kappa Sigma Phi originated in 1943 at the Philadelphia Textile Institute. A chapter of the sorority was formed here at the Institute in 1949. Its purpose is to promote the goal of knowledge, sincerity, and fraternity. Each of the members is dedicated to assisting her sisters in attaining social and educational development.

The Bernice Arenberg Memorial Scholarship Award, an inter-fraternity award for the highest academic average, is now the permanent possession of Kappa Sigma Phi after having been won for three consecutive years.

A faculty luncheon, as well as a cake sale, are annual projects sponsored by the sorority. In October, the sorority members hold an "Open House" to become acquainted with prospective members.

PSI
BETA

ORGANIZATIONS

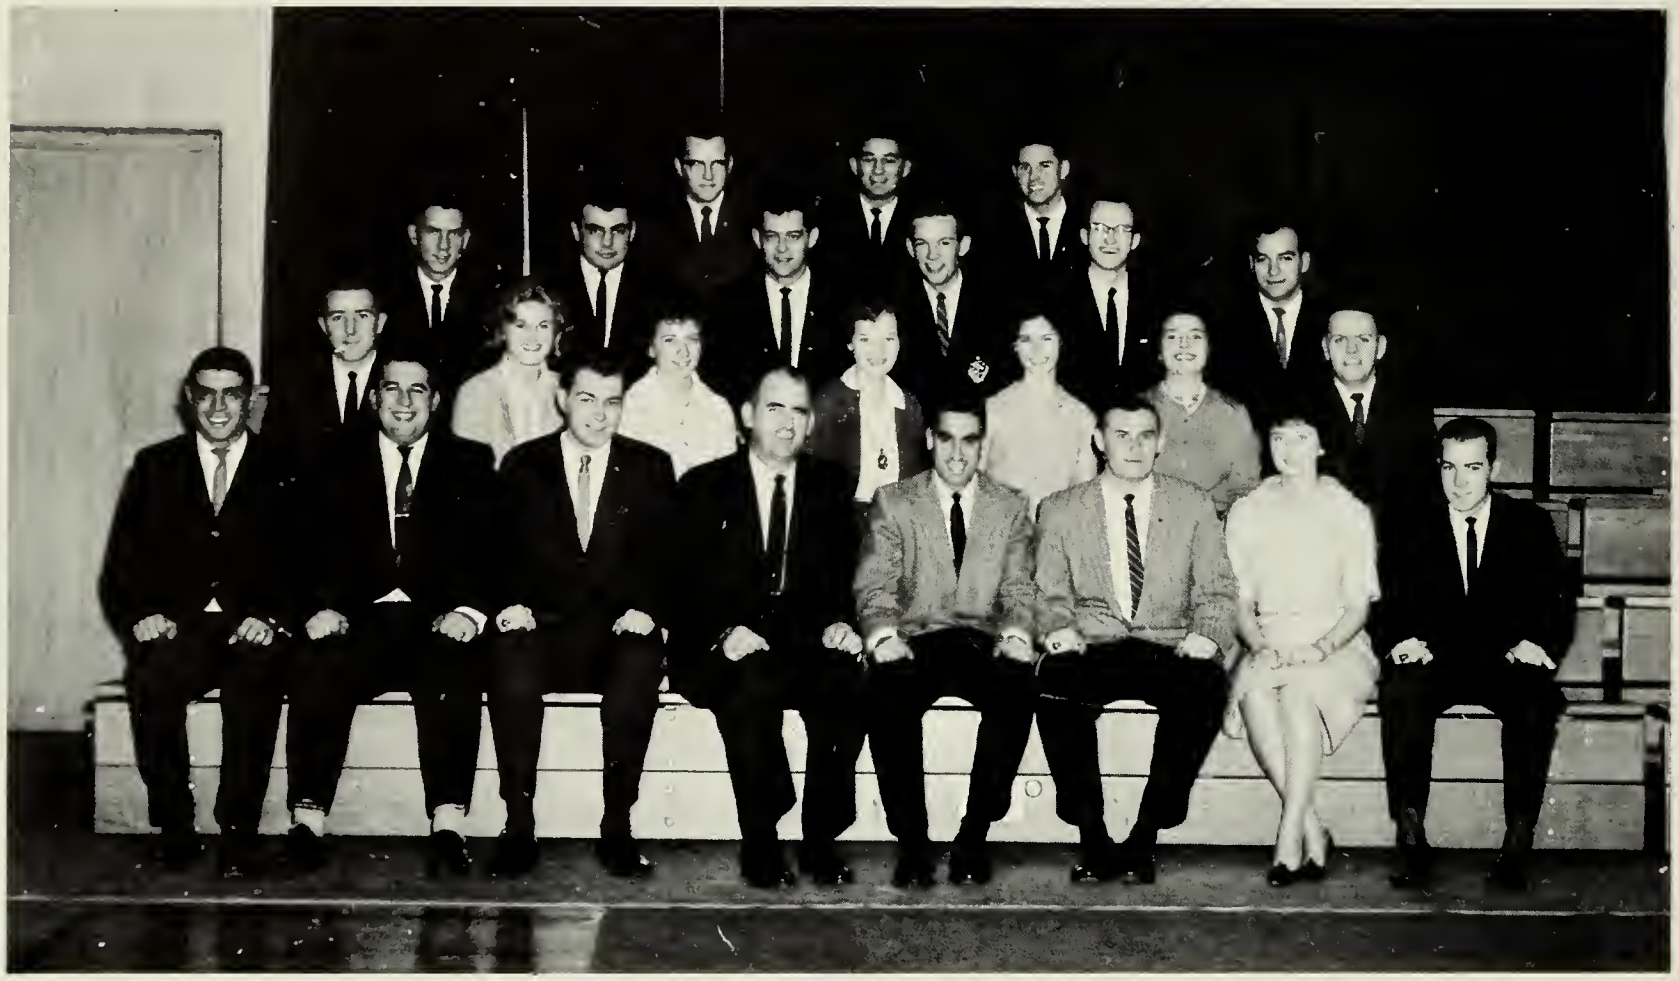

NEW BEDFORD TECH WOMEN'S CLUB

The New Bedford Tech Women's Club was formed this year with the purpose of becoming a sorority in the near future. Its members feel that with the growth in the number of female students at Tech, one sorority is not enough to accommodate all.

Therefore, the officers have been hard at work drawing up a constitution and taking other steps necessary to form such a group.

YEARBOOK STAFF

It takes a lot to produce a Yearbook — especially one on time — a few of the qualities are, hustle, cooperation, and most of all, there is needed, the vital spark of enthusiasm. Without this quality, the Mainstay Yearbook would certainly have floundered to a fatal finish. Gathered on this page are the members of the Mainstay Staff, who through their determination and enthusiasm have made this Yearbook possible. And so in this moment of reflection, I wish to thank not only this group, but also the entire class for the cooperation they gave when it was needed.

The Editor.

STUDENT COUNCIL

The Student Council is a unique organization at New Bedford Tech. Its primary purpose is to formulate student opinion. The Council also serves as a liaison between the student body and the faculty and administration.

The Council is composed of the four class officers from each of the classes. The officers of the Council are elected from its membership.

This is the first year that the president of the Junior Class does not automatically become the president of the Council. With the new constitution now in effect, the president can be any member who has served on the Council for at least one semester. This is to assure that the president will be familiar with the functions of the Council.

Each year the Student Council receives a $10 activities fee from each student. With this money, the Council makes allotments to the four classes and to student organizations desiring financial aid.

The Council sponsors such well-known annual functions as the Welcome-Back Banquet and the Farewell Dance.

THE NEWMAN CLUB

The Newman Club is a Catholic organization found only in non-secular colleges. Its goal is to promote the furtherance of Catholic education on the college level and also to inspire the teachings of Christ to Catholic students.

At New Bedford Tech, these aims are accomplished by means of lectures on Christianity and various elements of the Faith by prominent professional laymen.

While this is not a social group, there is a traditional annual post-Lenten dance. Other activities include an annual Communion breakfast in the spring, as well as sponsorship of some cultural activity during the academic year.

PROTESTANT FELLOWSHIP

The aim of the Protestant Fellowship is to bring about Christian fellowship through worship, cultural achievement, and social activity.

During the course of the year, the group invites guest speakers, forms panels, and engages in discussions. In addition, the Fellowship attends worship services and participates in occasional field trips.

TECH TALK

Tech Talk is the official publication of the student body of the New Bedford Institute of Technology. Its purposes are: to keep the student body well-informed on school happenings and other affairs of interest; to provide for the student a medium for expression of opinions; to encourage the practice of the use of the English language, and thereby to establish a familiarity with its use to provide an opportunity for the student to participate in a business-like organization; to provide an outlet for expression; and to provide an organization for the journalistically inclined.

Tech Talk offers a variety of opportunities: a chance to assume responsibility for those who might become editors; the possibility of meeting faculty members, trustees, or leading citizens through interviews; the chance to meet people in various and diverse business while working on the advertising staff.

AATT

The American Association of Textile Technologists was organized by textile students who felt that there was a great need to supplement their education while attending college.

The aims of the American Association of Textile Technologists are: to encourage, in the broadest and most liberal manner, the advancement of textile technology in all its branches; to promote interchange of professional knowledge among members of this association and between this association and other technical societies, associations and organizations; to stimulate fraternal intercourse among technologists; to promote means for the diffusion of the knowledge of textile technology; and to consider the establishment and promulgation of standards.

The program that the A. A. T. T. club offers to textile students here at Tech includes field trips, training films, dinner meetings, and lectures by well-known figures in the field of textile technology.

GLEE CLUB

The Glee Club was organized in 1958 and has since become a most popular organization.

The club takes part in numerous programs throughout the year, both at Tech and at civic events. The highlights in the Glee Club's schedule are Christmas carolling, presentation of a Christmas program, an appearance during Music Week, and participation in the commencement exercises.

BUSINESS MANAGEMENT CLUB

The Business Management Club was formed in May of 1961. The club limits membership to students of Business Administration who are majoring in Management. Its size makes possible informal group discussions, as well as luncheon meetings with local business leaders.

In its first year, the club was selected to organize and coordinate the activities of the Area Opportunity Employment Conferences in conjunction with the Placement Office and the Department of Business Administration. These conferences were designed to acquaint senior students with area businessmen and the employment possibilities with the State and Federal governments.

National affiliation with the American Management Association is planned.

LIBRARY

CLAIRE RILEY — Librarian

Dedication of HERMAN BISHAN'S Audio - Visual Room

AMERICAN CHEMICAL SOCIETY

The "Chem Club" is made up of student affiliates of the American Chemical Society. It is devoted not only to the academic, but also to the professional development and advancement of the chemistry student.

The club's activities include industrial tours and lectures by businessmen, by faculty members, and by graduate students here at the Institute.

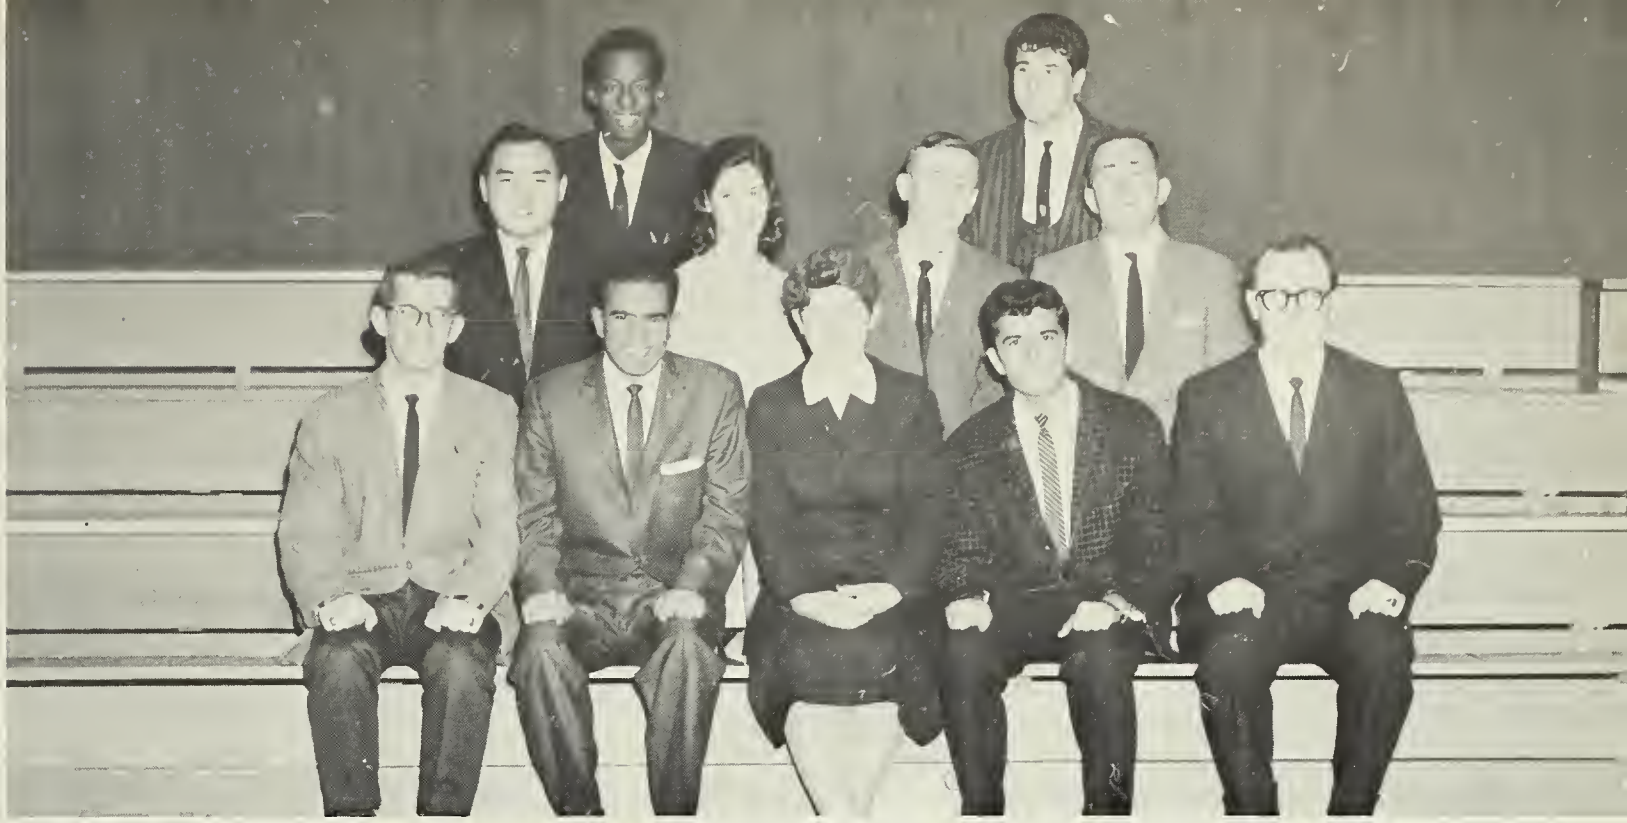

With the increased enrollment of chemistry students, the organization looks forward to even more participation and activity.

AIEE - IRE

The American Institute of Electrical Engineers and the Institute of Radio Engineers, Joint Student Branch, was formed in the spring of 1960. Prior to this time, the American Institute of Electrical Engineers, started in 1954, was the only professional engineering organization represented at the Institute.

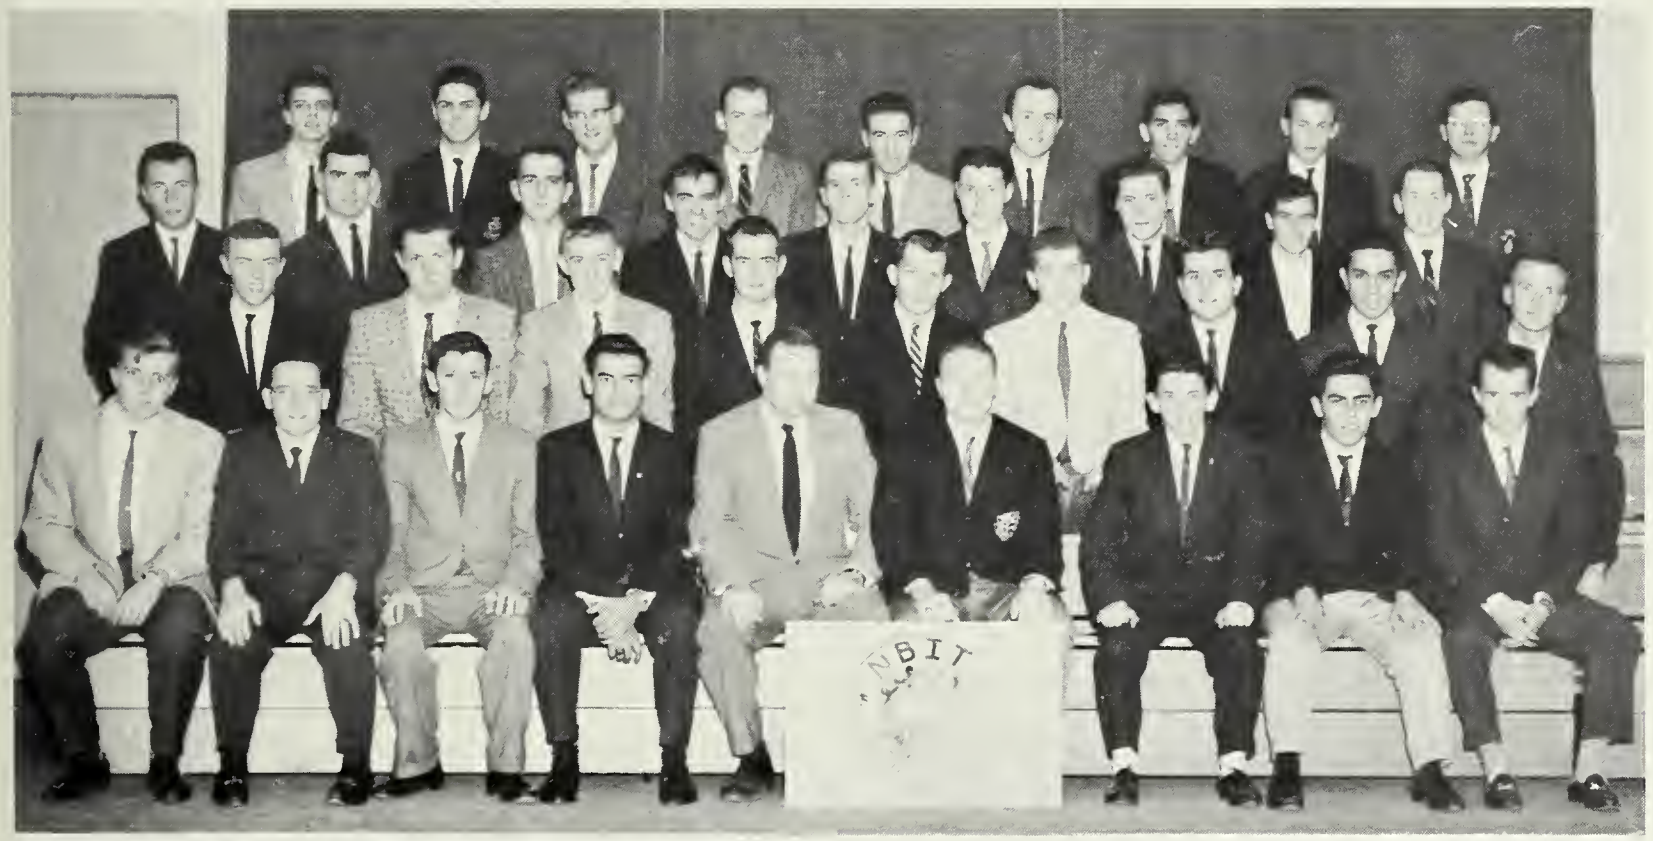

The aims of the Joint Branch are to keep the student engineer abreast of the developments in his field and to further his professional education by sponsoring field trips and providing guest speakers.

INTERNATIONAL STUDENT ORGANIZATION

The International Student Organization was formed in 1960 through the efforts of a group of foreign and American students. Its slogan is "peace and friendship through mutual understanding."

The aims and ideals of this organization are: to promote goodwill and friendship among students from all nations, at Tech as well as in the New Bedford community; to sponsor educational cultural, social, and athletic events; and to help the incoming foreign students in finding apartments and summer jobs, and in assisting them with any other orientation problems while attending New Bedford Tech.

MECHANICAL ENGINEERING CLUB

The Mechanical Engineering Club was founded for the purpose of furthering the knowledge and education of the engineering student. Its objectives are to obtain a broader perspective in engineering; to create a closer relationship between the students and industry; to attain a closer correlation between theory and practice; and to provide opportunities for engineering students to participate in social activities.

I. F. C.

The Inter-Fraternity Council was instituted in 1947, when the two fraternities, Phi Psi and Delta Kappa Phi, and the sorority, Kappa Sigma Phi, realized there was a strong need for a joint governing body to settle any differences that might arise.

In 1958, a new member was added to the Council when Nu Beta Tau fraternity received its charter. With the addition of this new member, the present constitution was drawn up, incorporating a new code of ethics for the Council members to follow.

It is the primary aim of the I. F. C. to promote better relations among all of its members and to ensure cooperation between the sorority and fraternities in their relationship with the faculty, students, and public, in general.

CIRCLE K CLUB

The Circle K Club is an international service organization sponsored by the Kiwanis International. The aims of the club are to develop leadership and confidence, and to encourage young men to serve their college and community.

Circle K donates its services in sponsoring, each year, Parents' Night, a get-together for freshmen and their parents with the faculty. The club also provides for an annual athletic scholarship.

The achievements of the Circle K have gained recognition for the club from both students and the administration.

SPORTS

BASKETBALL

The 1961-62 basketball season was a pleasant surprise for both the team and Tech rooters. With a shortage of height and two freshmen starters, the prediction was that Tech would have to suffer through a "rebuilding season." But the Whalers broke fast and captured the first 8 out of 10 games. Although short under the boards and green in few spots, Tech hustled their opponents off the floor with fast breaks. With Bruce Violante and John Pacheco pouring through an average of 19 points a game, Tech kept hot, ending the season with a fine 13-8 record.

BASEBALL TEAM

The 1962 New Bedford Tech baseball team, under the direction of Coach John Regan, is a talented squad spiced with many returning veterans of past campaigns.

Warm southern weather was the setting for the team's first action on the annual southern tour as the Tech nine defeated Richmond Professional Institute twice, before losing games to Campbell College, Atlantic Christian College, and Randolph-Macon College by narrow margins. These successive losses give little indication of the team's potential, as Coach Regan substituted his reserves regularly.

Seniors Vern Berry and "Rip" Regan proved to be big assets to the Tech nine as these 4-year veterans hit and fielded very well.

Underclassmen expected to aid Vern and "Rip" as the season progresses are: Captain Johnny Trznadel, Danny DaLuz, Leonel Bourassa, Bob Parker, John Pacheco, George Pires, Don Duilio, Ron Ponte, Dick Lafferriere, Butch Scallione, Hawthorne Rossi, Bobby Santos, and Jim Stott.

SOCCER

George Pires performed masterfully in defense of the goal slot, strong with his two compatriots, Dave Fernandes and John Charves as fullbacks who would hurl their bodies in defense of the net. At the half slot, John Pacheco, Leonel Bourassa, and Bill Titcomb notably set up many plays for the line proving that theirs was the key position. Last, but not least, was the line with such outstanding sons of Mercury as Bill Butler, Ronnie Ponte, Eddie Sylvia, Johnny Trznadel, and Freshman Jimmy Stott.

The Whalers will bounce back again next year but without the valuable assistance of Dave Fernandes, Eddie Sylvia, and Bill Titcomb, which will prove to be a great loss to the team. Fortunately, however, there will be many promising Freshmen returning, ready to do battle amongst themselves for these open positions. With a lot of practice and training under the old warrior, Coach Cloutier, they may surpass these out-going giants and continue to make New Bedford Tech THE team to beat.

"Goals, goals, and more goals" was the battle cry this season for New Bedford Tech's Soccer team, and goals they got, scoring 52 cannon shots and having only 15 scored against them in 14 games.

The Whalers of Tech had one of the best, if not the best, soccer seasons of its existence here at the Institute, compiling a 13 win, 1 loss record and capturing for the third consecutive season, the Colonial Intercollegiate Soccer League Championship.

The team had compiled a tremendous string of 36 wins in three years without being defeated and they were ranked, according to a Boston newspaper, as third in the entire nation.

As the team's strength grew, they obtained a game with Howard University of Washington, D. C., undisputed No. 1 in the nation. Unfortunately, they proved to be too strong for our team that day and Tech registered its first loss in 37 games.

CHEERLEADERS

Composed of a spirited group of girls, the New Bedford Tech cheering squad is selected in the fall of each year. The squad undertakes such projects as making uniforms, painting signs, decorating the gym, and planning rallies.

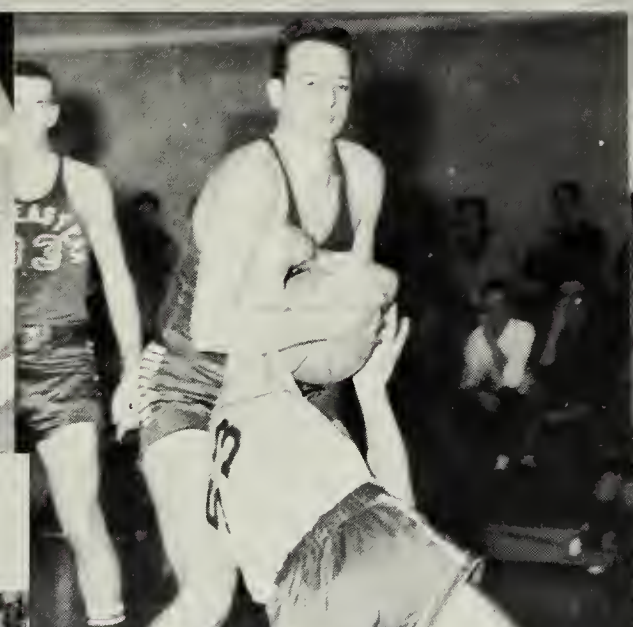

Long hours of planning, practice, and drill are the code of the cheerleaders as they strive for pep and accuracy. Through rallies and enthusiastic cheering at the games, the cheerleaders back the athletic teams and boost the school spirit of the student body.

DURFEE
COLLEGE
14

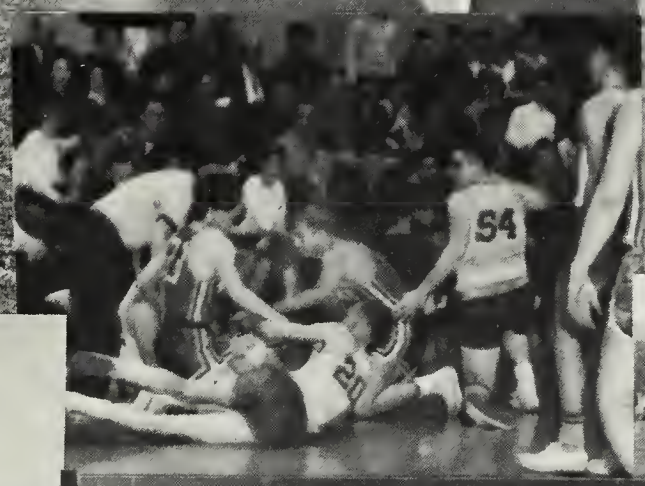

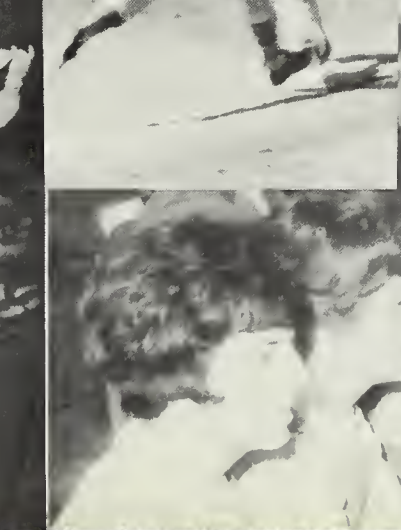

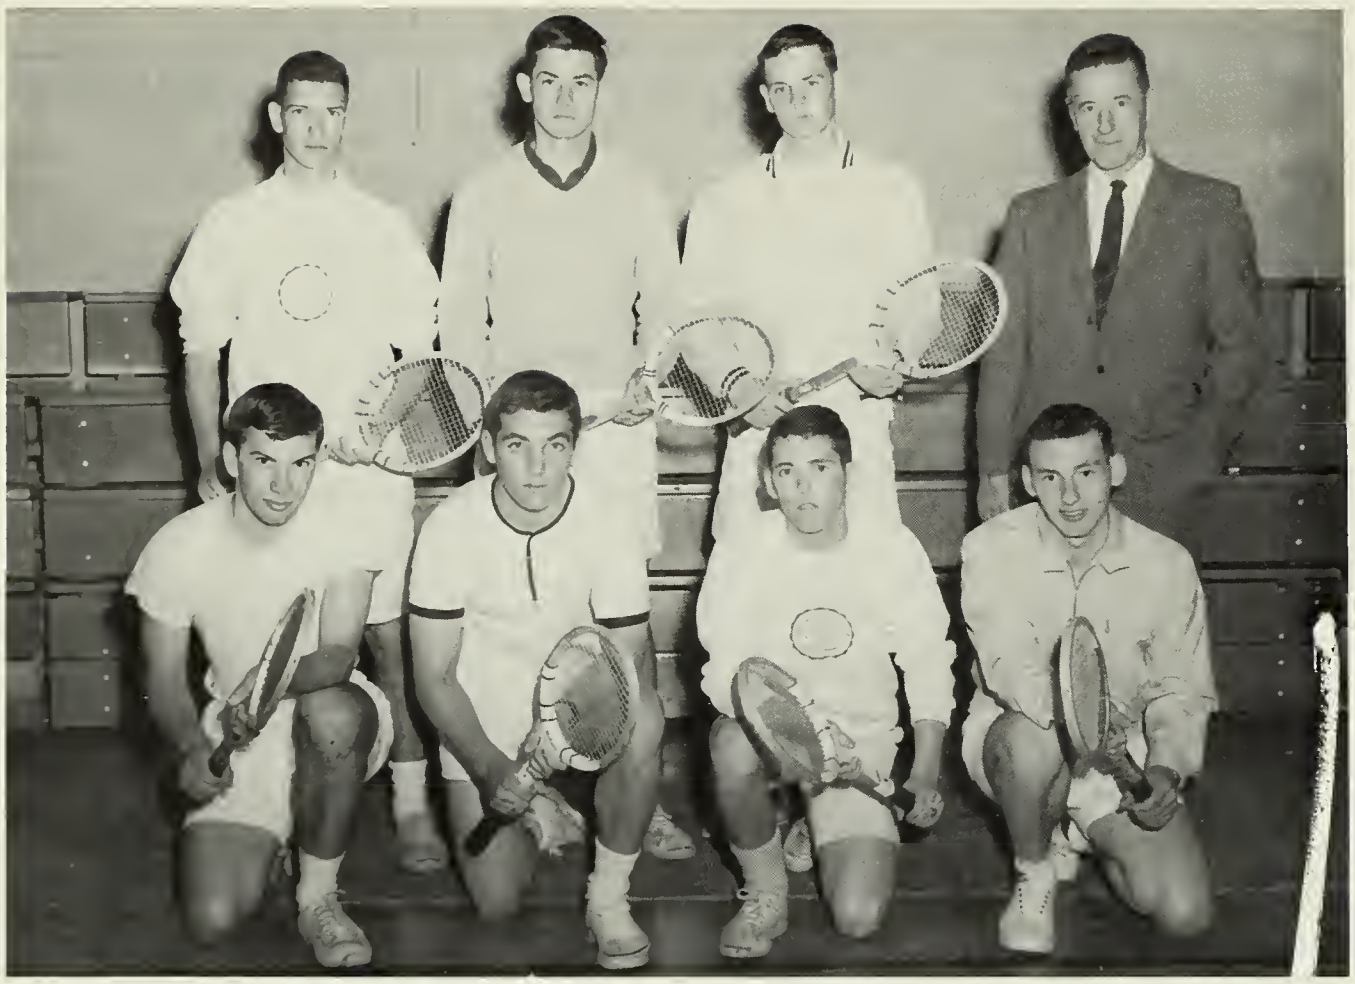

TENNIS

The 1962 New Bedford Tech tennis team appears to be one of the strongest teams in the area. Tech has five of its players back from last year's championship team. In addition, we have added two new freshmen who have proven themselves to be top-notch contenders.

In the first match this year, Tech smashed a strong Stonehill team 8 - 1, with Tech winning all the single matches and losing only one doubles match.

Tech is now looking forward to the NAIA Conference Tournament at Bridgewater where we hope to bring home the title.

This year's team is comprised of Frank Fletcher, Captain Roger Ames, Peter Mendell, Bill Titcomb, Manny Sumares, Steve Lefkowitz, Bill Hall, Jeff Jackson, Bill Hayden, Butch McNamara, and Fran Wachawik.

FORE!

Look out, fairways, here they come!

This year, the New Bedford Tech golf team is the strongest in years. Having added Providence College, Bowdoin College, Lowell Tech, and Merrimac College to their schedule, the Whalers will be out again to match last season's unblemished record.

Coach Macedo will have four lettermen returning from last year's fine squad: Bill Margeson, Jim Osborne, Fred Purrington, and Paul Duval. Newcomers to the team include freshmen Peter Bass, Norm Secia, Peter Guisti, and transfer student, Allen Luckraft.

All in all, it looks like another banner golf year for the hard-hitting Whalers.

WILLIAM & SECOND STS. 5 NEW BEDFORD, MASS.

Special
TEXTILE DICTIONARY
for BEST RESULTS in Textile Processing

C

Castrolite® (kăs′trō·līte)

A highly sulphonated castor oil made by an improved process of manufacture. A stable penetrant for dyeing or kier boiling. Used extensively in finishing.

D

Discolite® (dĭs′kō·līte)

Concentrated sodium sulphoxylate formaldehyde available in lump, pea, rice or powder form.

A powerful reducing agent, stable at high temperatures. Widely used to effect reduction and solution of vat colors, and for discharge effects when applied to colored grounds. Effective when mixed with vat colors and discharge pastes wherever the reducing agent must retain its reducing power after being dried into the fabric.

Dispersall (dĭs·pûr′sal)

A long chain ethylene oxide condensate in the form of a colorless, neutral, somewhat viscous liquid. Fully resistant to hard water, and miscible with water in all proportions. A retardant and leveling assistant in vat dyeing.

Used widely as a dispersing agent in dyeing synthetic fibers with disperse colors and for fast color salts and bases in Napthol dyeing and printing.

Effective in stripping to prevent redeposition of the color on stripped goods.

N

Neowet (nē′ō·wĕt)

Complex Polyethelene Ether in the form of a pale yellow, slightly viscous liquid.

A non-ionic surface active wetting agent, effective at all temperatures. Completely compatible with enzymatic desizing agents and readily soluble in water. Contains 33⅓% active ingredients. Widely used in scouring all types of textile fabrics and for general wetting purposes.

Neowet X (nē′ō·wĕt)

Organic Ether Sulphonate in the form of a water white slightly viscous liquid.

An anionic surface active wetting agent, effective at all temperatures. Does not affect enzyme activity in desizing. Compatible with hydrogen peroxide and resin finishes. High detergent value. Contains 20% active ingredients.

Neozymes® (nē′ō·zīms)

Desizing agents made up of amylolytic, proteolytic and fat splitting enzymes available in the form of crystalline powder or liquid concentrate for high or low temperature requirements.

Neozymes quickly remove all trace of starch glue or gelatin sizing without danger of damage to even the most delicate fabrics. For best results, use with NEOWET to speed saturation.

P

Parolite® (păr′ō·līte)

Zinc sulphoxylate formaldehyde in the form of white crystalline powder. A highly concentrated stripping agent for all forms of wool and modern synthetics.

Completely soluble in water. Leaves stripped goods soft, completely free of zinc dust and in most receptive condition for further processing. Often completely strips goods where other stripping agents fail. Very effective in discharge printing on acetate rayon.

V

Vatrolite® (văt′rō·līte)

Concentrated sodium hydrosulphite in the form of white crystalline powder. A powerful reducing agent for vat colors, ideal for dry feeding because of its free flowing, dustless character. Completely soluble in water.

Effective stripping agent for direct, sulphur and vat colors on cellulosic fabrics.

Quickly removes rust stains from cotton goods.

May be stored indefinitely.

Available with optical whites and in buffered formulas for high temperature use without excessive alkalinity.

Velvoray® (vĕl′vō·rāy)

A high grade finishing oil made up of sulphonated vegetable oil combined with specially selected fats.

Compatible with all materials commonly used for finishing textiles. Will not foam, smoke or oxidize. Imparts no rancid odor. Gives body and has emulsion stability. Widely used to add a silky softness to all types of fabrics.

Velvo Softener (vel′vō)

A highly sulphonated tallow in the form of a creamy white paste, easily dispersed in water. Used in general finishing of all types of textile fabrics. Will not "smoke off" or change color in high temperature operations such as calendering or drying. Has no effect on light fastness of colors.

Strategically placed warehouses plus company owned trucks add up to fast dependable delivery, every time.
